👤 Profile

I'm the kind of developer who can't help but think, *"Why doesn't this exist?"* and then wants to build it. I've worked across **the entire web development** lifecycle, from **backend** to **frontend**, with experience building scalable systems using **Redis** and **Kafka**, as well as **AWS infrastructure** and **CI/CD pipelines**. Recently, I've been exploring how AI can create more intuitive and seamless user experiences.

Rather than building technology for its own sake, my goal is to create products that people naturally come back to because they make everyday life a little easier.

📁 Professional Experience

Backend Developer 11/2025 – 01/2026
Furence 🌐

- **Backend Architecture & Security:** Designed backend architecture for LG U+'s call recording system and implemented user/permission verification logic, strengthening system security.
- **Large-File Processing Pipeline:** Built a large-scale audio upload and processing pipeline based on TUS, enabling stable file handling at scale.
- **REST API Development & Reliability:** Designed REST APIs for call recording history management, implemented metadata validation logic, and improved exception handling to strengthen system stability.
- **AI Contact Center & STT Integration:** Supported AI contact center features built on an STT-based call processing workflow, collaborating with the product team on security and compliance requirements.

Full-Stack Developer 03/2024 – 10/2025
ThinkStorm - Platform where developers gather to select and collaborate on team projects.

- **Backend Architecture Design:** Designed backend structure and REST API architecture on Nest.js, prioritizing maintainability and scalability.
- **API Optimization & Rate Limiting:** Applied Redis caching and rate limiting to improve API response performance and strengthen traffic stability.
- **Authentication & Security:** Built a JWT-based authentication/authorization system and established a security management process using GitHub Actions and Docker.
- **DevOps & Deployment Automation:** Designed a Jest-based testing environment and CI/CD pipeline to automate deployments and improve operational stability.
- **Frontend Architecture Design:** Built SPAs with React/Next.js and designed state management architecture using Redux, TanStack Query, and Zustand.
- **Collaboration Process Improvement:** Improved onboarding and collaboration processes for new developers, accelerating their ramp-up on the project.

Full-Stack Developer 07/2023 – 03/2024
Sherpasoft 🌐

- **DB Performance Monitoring System:** Developed a database performance management solution for a large enterprise client using Java and Spring Boot.
- **Business Process Automation:** Built an internal reporting system that shortened meeting times and improved operational efficiency.
- **Message Queue Review & PoC:** Reviewed an asynchronous messaging architecture based on Kafka and ActiveMQ and proposed a proof of concept.
- **Data Pipeline Development:** Built a platform for automated log collection and integration, improving data-sharing efficiency across departments.

Allra Fin-Tech

- **Payment System Development:** Developed and maintained payment system features using JSP and Spring Data JPA.
- **Agile Development Experience:** Developed features and collaborated with the team in a one-month sprint cycle.
- **Enterprise Architecture Learning:** Learned practical architecture patterns through senior developer code reviews and feedback.

Skills

- **Frontend:** React.js, Next.js, Redux, TanStack Query, Tailwind CSS, SCSS, HTML5, Streamlit
- **Backend:** Node.js, Nest.js, Spring Boot, Express.js, FastAPI
- **Database:** PostgreSQL, MongoDB, MySQL, Redis, OracleDB
- **DevOps/Infra:** AWS (Certified), Docker, GitHub Actions, CI/CD Pipeline Design, Render, Fly, Netlify, Cloudflare
- **Testing:** Jest, JUnit, TDD
- **Tools:** Git, ESLint, Prettier, Webpack, Vite, Parcel

Certificates

- AWS Certified Developer – Associate
- AWS Certified Cloud Practitioner

Education

AI Service Developer Program with MCP 04/2026 – 07/2026

DMC Conet

- Prompt engineering
- Building LLM applications with LangChain
- Implementing a RAG-based document search chatbot
- AI backend development with FastAPI

Full-Stack Developer Bootcamp 01/2023 – 06/2023

MultiCampus

- **Team Project Leadership:** Led two team projects as team lead, managing the collaboration process.
- **Technical Skill Building:** Completed a full-stack development curriculum based on React, Java, and Spring, including hands-on project work

B.A. in English Language and Literature (GPA: 4.2/4.5) 03/2017 – 02/2023

Incheon National University

- Graduated at the top of the department and received the Dean's Award for the College of Humanities
- Built a foundation in computing systems theory by taking electrical/computer engineering courses

Languages

English Spanish
TOEFL 100 / IELTS 7.5 / TOEIC 920

Organisations

UNESCO 10/2021 – 10/2021

Interpretation & Translation Support Volunteer

- Supported the smooth operation of the 5th International Conference on Learning Cities, with a focus on the Sustainable Development Goals (SDGs) related to health, education, and gender equality.
- Facilitated global collaboration and the exchange of ideas among participants from diverse countries, including discussions on the COVID-19 response and ensuring educational equity during the pandemic.
